

Centre for Quantum Technologies and Complex Systems (CQTCS)

School of Sciences | CHRIST (Deemed to be University) | Kengeri Campus, Bengaluru

MSc in Quantum Technologies by Research

About the Programme

Quantum technologies are at the forefront of the next technological revolution. This research-led MSc responds to India's National Quantum Mission with rigorous coursework, mentored research, and hands-on training across quantum, photonics, and semiconductor domains.

APPLY NOW

Programme Snapshot

- Interdisciplinary postgraduate programme led by CQTCS from Semester 1.
- Programme commencement: June 2026.
- Strong pathway to PhD programmes, research labs, deep-tech start-ups, and quantum industries.
- Expected annual package range: Rs. 7 to 10 lakhs in emerging quantum, photonics, and semiconductor roles.

Research-driven

Hands-on labs

Quantum + Photonics

Mentored projects

Eligibility

- B.Sc. (4-year), M.Sc., or B.Tech/B.E. in science or engineering disciplines.
- Minimum 60% marks or CGPA 6.5/10.
- Mathematics studied for at least two years during the qualifying degree.

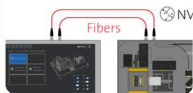

Why It Stands Out

Advanced exposure to quantum hardware and software, quantum-safe communication, precision measurement, and research practices aligned with national and global demand.

One programme. Three research-facing experiment tracks.

Experimental Training

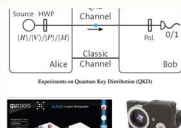

The programme introduces students to single-photon instrumentation, quantum key distribution workflows, and quantum state tomography so they build laboratory intuition alongside theory.
